

LUMEN 6

BBQ Specifications

304 STAINLESS STEEL

The stainless steel used in Fontana barbecues is exclusively 304, the same as that used in professional kitchens, which is the best for strength and does not rust over time, even when exposed to the elements.

PRECISION WELDED

Fontana tradition speaks of precise welding to provide unprecedented strength and rigidity. The craftsmanship in welding joints protects against corrosion, preventing exposed parts from rusting over time. Welding is considered superior to screws and rivets that can loosen over time.

INDIVIDUAL PIEZO BURNER AND CONTROL KNOBS

Fontana barbecues feature a reliable piezo ignition system with brass control valves, as well as galvanised steel control dials that are extremely durable and corrosion-resistant.

DOUBLE SKINNED ROLL TOP ROASTING HOOD

Made entirely of high-temperature galvanized painted steel, both the structure and the anti-scald handle feature a double-body construction, allowing maximum heat retention and thus the achievement of temperatures in excess of 350°.

FIREPLACE

The firebox of Fontana barbecues is made entirely of stainless steel.

Cooking grids

Durable and robust, made of stainless steel, they promote uniform grilling.

Warming grid

Each barbecue is equipped with a full-length warming grill to keep cooked food warm while you complete the rest of your cooking.

Burners

The beating heart of Fontana barbecues, the cast stainless steel burners ensure even heat distribution over the entire cooking surface thanks to their high performance.

Rear infrared burner

With a radiant heat distribution system that allows you to reach higher temperatures faster than other solutions. Also ideal for cooking food or slow-cooked dishes such as 'spiedo', churrasco or kebabs.

Halogen illumination

Integrated inside the firebox to ensure perfect lighting for every chef during cooking.

Weight

74 kg

Grates Material

Stainless Steel

Burner Material

Cast Stainless Steel

Grates Thickness

9.0 mm

Gas Type*

GPL

Cooking Surface Dimension

4.370 cm² | 95×46 cm

No of Burners / Power

5 / 4.1 kW

Dimensions

100x67xh50 cm

Power

20.5 kW

Capacity

Suitable for 15-20 people

Infrared Rear Burner / Power

Yes / 2.95 kW

Control Panel Material

Ultra durable powder coated galvanized steel

Ignition Type

Piezoelectric

Grill Hood Material

Ultra durable powder coated galvanized steel

Knobs

LED-lit, Orange | White

Chassis Material

Stainless Steel
